

2019 FACT SHEET

VA SALT LAKE CITY HEALTH CARE SYSTEM

Who We Are

VA Salt Lake City Health Care System (VASLCHCS) is part of the Rocky Mountain Veterans Integrated Service Network (VISN 19) which includes facilities in Utah, Colorado, Oklahoma, Montana and Wyoming.

Our health care system consists of our main facility located in Salt Lake City, Utah and ten community clinics across Utah, Idaho and Nevada spanning 125,000 square miles. We provide healthcare to over 67,000 eligible Veterans across one of the largest geographical areas in VA.

The George E. Wahlen VA Medical Center is a 121-bed facility and serves as the anchor for the health care system. Located on an 81-acre campus situated at the foot of the Wasatch Mountain Range, we support an active academic affiliation with the University of Utah and a host of other academic institutions. A wide range of tertiary services are provided, including a regional heart transplant program operated in conjunction with the University of Utah.

What Makes Our VA Special

Telemental Health HUB

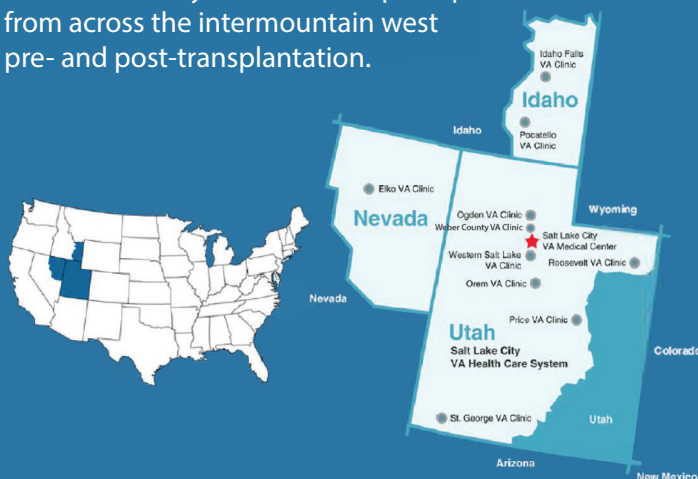

VA Salt Lake City is the National Telemental Health HUB and provides mental health services to our most rural Veterans across the country with rapid access to mental health services where local barriers exist. This expanded effort will help close the gap in access to mental health care.

Whole Health

As a flagship facility for the Whole Health program, VASLCHCS provides a whole health approach to health care that empowers and equips Veterans to take charge of their health and well-being, and to live their life to the fullest.

VA National Transplant Program

We are one of five VA Heart Transplant Centers in the United States. In conjunction with the University of Utah, VA Salt Lake City cares for transplant patients from across the intermountain west pre- and post-transplantation.
